- Easily accessible accessory mounting options to make any ute ready for adventure at a moment's notice
- Expertly engineered mounting brackets make for easy and secure installation

**FRONT
RUNNER**

↔ DOMETIC

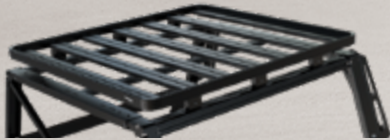

Torsional stresses are countered by cross bracing the system, while the fixed top bars ensures maximum structural integrity.

The Pro Bed Rack System is secured over the tub using Front Runner's vehicle-specific mounting brackets that secures the system to existing factory mounting points. Drilling may be required.

Integrated top mounting T-slots allow for the addition of a Slimline II Roof Rack that easily accommodates 55+ additional accessories.

Side mount functionality allows for several accessories to be fitted in multiple configurations.

Pro Bed Rack System works with all ute tub liners and most drop-in liners.

THE FRONT RUNNER PRO BED RACK SYSTEM

Designed specifically for pick-up owners, the Pro Bed Rack System offers a robust, lightweight, and modular storage solution for all overlanding, camping, and a variety of activity gear needs. The Pro Bed Rack System adopts the strength, modularity and versatility that are the hallmarks of Front Runner's best-in-class roof racks, and applying those principles as a multi-functional load bed storage solution.

Developed to be an easy mounting solution for all your vehicle-based adventure necessities, the Pro Bed Rack System is designed to make gear easily accessible from the side of a pick-up's load bed area without encroaching on the available space within the pick-up's load bed.
